KENYA Land of Mystery and Marvels

Happy Memorial Day, All!!!

I hope you're all enjoying a very Happy Memorial Day!!! That's why it is so difficult to tell you that we may have to postpone or cancel this trek... :>(

I began working on this trek after receiving so very many emails practically begging me to do so! Those emails came from folks who'd traveled with me before as

well as those who'd heard about the last Trek to Kenya. Unfortunately, Covid has scared off too many of those original Trekkers! To those of you who have been with me from the start, "Thank You" ... now you

need to let me know your choice. Shall we postpone for a later date or cancel and work on a different trek for next year??? I would really appreciate a response ... if we do postpone, let me know you're suggested dates ... realizing UTg will TRY to keep the same rate, BUT understand

right now, there are NO reservations available (within many of the properties we'd be visiting) for September, October, or November 2022 so we may have to be in different properties than those shown. I hope those of you who are "on the fence" will reconsider and jump off to our side so this trek can go forward!!! :>)

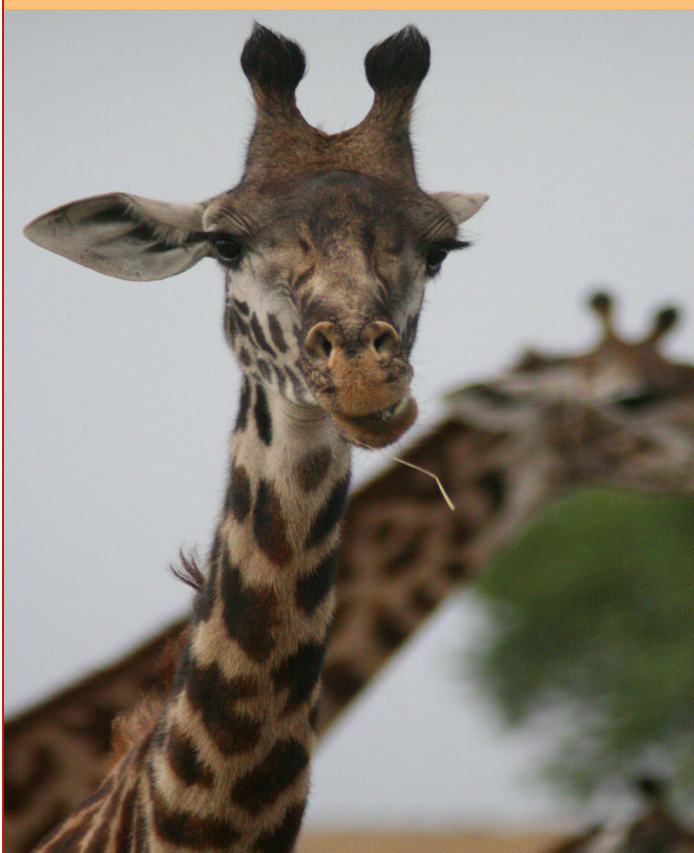

Since my first visit in the '90s, I've seen so many upgrades to Kenya that I fear in the not too distant future, we may not see as many animals in the wild ... we'll have to visit zoos to see what's left of them ... and that is NOT the same as seeing them run free as they should.

We have only a short while until UTg must release our space, so PLEASE let me know your decision is YES, you will join us. To those of you whom have already done so, Thank you!

Now let's see a few more of the amazing animals we may see on this trek!

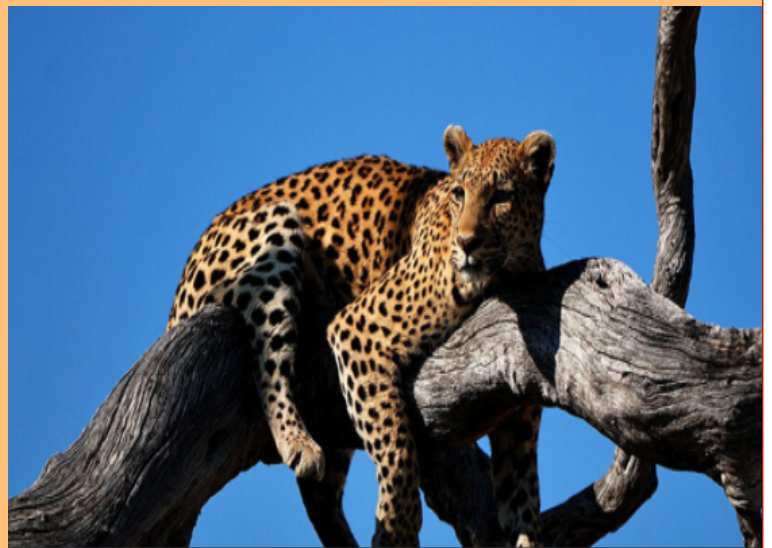

Remember, we'll be up close and personal with these guys when we get to the Giraffe Centre. You'll be able to hand feed them and see how gentle they are. :-)

So far UTg has had people returning from Kenya with glowing reports of having the BEST vacation EVER! No one has been ill and many are already rebooking for next year! Kenya has the least cases of Covid ever and they continue to keep up all the safety measures!

Keep in mind all the pluses of this trek ... this is a vacation you'll never quite experience again - unless you travel with us in the future, but then those experiences will be completely different!!!

'til next week, Kwa Heri!!!
