# KENYA!

## Land of Mystery and Marvels

Another beautiful sunrise in the Savannah of Kenya!

Will you be enjoying this with us???

*"I never knew a morning in Arica when I woke up that I was not happy." -Ernest Hemingway*

As of this writing, entry requirements for Kenya are a Visa and a negative Covid PCR test taken within 72 hours of arrival. You will also need a negative PCR test prior to departure for re-entry into the US. We hope those requirements are lifted by September 2022. Anti-malaria protection (pills) are suggested and you should discuss that with your doctor. Personally, I've never seen a mosquito in Kenya, but better safe than sorry! No other vaccinations are required for entry into Kenya. Just in case, every bed is fitted with mosquito netting.

This is a Genet, which means "Heaven" in Africa. It looks like a cat, but is really a Viverridae which is a class of mammals, but I'm not giving a lesson today! LOL!!! I was fortunate to meet one of these up close and personal when Tented Camp in (Remember, dinning room they'd secured a tree right night a Genet dinning room other to get up station and one night she brought her cubs. It was quite something to watch as this beautiful animal calmly, gracefully walked past our legs headed for dinner!

saying at Larsen's Samburu. Carol?) Their was a big tent and a feeding station in next to it. Every walked through the from one end to the to that feeding

Several properties arrange these feeding stations near their dining rooms, with luck one of those will be our "home away from home" and we'll all meet the Genet up close and personal! :>)

The itinerary shown a while back may change. I will keep the price as close to that quote as possible, but things are filling up in Kenya! If need be, I will go with another tour operator, but will always keep you informed!

This wraps up April's newsletters. ... as usual, send or call with your questions! Baadaye! (Later!)
